

SDLC (Software Development Life Cycle)

=====

- 1.What is SDLC?
- 2.What are SDLC phases?
- 3.What is requirement phase?
- 4.What is design phase?
- 5.What is deployment?
- 6.Difference between SDLC and STLC?
- 7.What are SDLC models? (Waterfall, Agile)
- 8.What is Agile methodology?
- 9.Role of tester in SDLC?
- 10.What is requirement traceability?
- 11.What will you do if requirements change frequently?
- 12.How does testing fit into Agile SDLC?
- 13.What happens if testing starts late in SDLC?
- 14.How do you handle missing requirements?
- 15.How do you coordinate with developers?

STLC (Software Testing Life Cycle)

=====

- 1.What is STLC?
- 2.What are STLC phases?
- 3.What is test planning?
- 4.What is test case design?
- 5.What is test execution?
- 6.What is entry and exit criteria?
- 7.What is test closure?
- 8.What deliverables are created in STLC?
- 9.Difference between test plan and test strategy?
- 10.What is defect reporting?
- 11.What will you do in requirement analysis phase?
- 12.How do you estimate testing effort?
- 13.What if test cases are incomplete before execution?
- 14.How do you handle failed test cases?
- 15.What metrics do you track in STLC?
